Building Management Systems DIMO Building Management Technologies with Siemens is the name to depend on for efficient building performance, security, safety and low operating costs. We provide end-to-end solutions, from design and project management, to installation and after sales service support.

Building Management Systems - DIMO

The building management system (BMS) is an overarching control system that is responsible for the automatic regulation and control of non-GMP facility subsystems, maintaining predefined parameters (or set points) and the control of their functionality. The major aim of the BMS is to guarantee the safety of facility operation, while also monitoring and optimizing the use and efficiency of its supervised subsystems to allow more efficient operation.
