10.1 Cell Growth, Division, and Reproduction

Cell division is also a crucial part of reproduction and the production of gametes, which are the sex cells.

Types of Cell Division

Three main types of cell division exist: mitosis, meiosis and binary fission. Mitosis creates two identical cells from one parent cell.

Cell Growth and Reproduction - Ringgold School District

- The process by which a cell divides into two new daughter cells is called cell division.
- Before cell division can occur, DNA must be copied.
- Each new daughter cell gets one complete copy of DNA.
- Dividing keeps the
