Systemic lupus erythematosus (SLE) is a multisystem autoimmune disease that predominantly affects women of childbearing age. The exact cause is still unknown, but hormonal and immunological influences as well as genetic predisposition are considered likely etiological factors.

Systemic lupus erythematosus - Knowledge for medical ...

Drug-induced lupus accounts for about 10 percent of all lupus cases and is caused by high doses of certain medications. The symptoms of drug induced lupus are similar to systemic lupus; however, symptoms usually subside when the medications are discontinued. [2] Neonatal lupus is a rare condition in which the mother's antibodies affect the ...

Updated October 25, 2017. Wallace DJ. Diagnosis and Differential Diagnosis of Systemic Lupus Erythematosus in Adults. UpToDate. Updated September 20, 2017.

How Lupus Is Diagnosed - Verywell Health

Our objective was to update the EULAR recommendations for the management of systemic lupus erythematosus (SLE), based on emerging new evidence. We performed a systematic literature review (01/2007–12/2017), followed by modified Delphi method, to form questions, elicit expert opinions and reach consensus. Treatment in SLE aims at remission or low disease activity and prevention of flares.

2019 update of the EULAR recommendations for the ...

Reviewed in the United States on January 29, 2020 This book has been revised beyond help. It's a book of many of questions that perrain to the many aspects of lupus. As a lupus patient myself, this book helped with questions I was too nervous to as my rheumatologist.

A Lupus Foundation of America-led delegation, including several world-renowned lupus experts and senior leaders from the Foundation, met with more than a dozen top decision-makers at the U.S. Food and Drug Administration (FDA) to present recommendations for improving lupus clinical trial design and to discuss actionable steps toward advancing these solutions.

Lupus Experts Present Consensus Proposals to FDA for ...

Lupus erythematosus, an autoimmune disorder that causes chronic inflammation in various parts of the body. Three main types of lupus are recognized—discoid, drug-induced, and systemic. Discoid lupus affects only the skin and does not usually involve internal organs. The term discoid refers to a

Lupus erythematosus | pathology | Britannica

They are commonly used in treatment for rheumatological inflammatory conditions: inflammations of muscles, inflammation of blood vessels, chronic arthritis, and lupus. They are used in lung diseases, kidney inflammation, eye inflammation, and to reduce swelling associated with tumours of the brain and spine.
