of 0, 1 ...

The number of decimals in the product must be equal to the number of decimals in the multiplicand and in the multiplier: The multiplicand 3.21 has 2 digits after the decimal point and the multiplier 2.9 has 1 digit. So the number of digits after the decimal point in the product must be 3:
 $3.21 \times 2.9 = 9.309$.

OVERVIEW OF MODULE

3 AIMS Module 3 has two aims, both equally important:

1. To develop instant recall or swift calculation of the basic (i.e. single-digit) multiplication and related division facts; and 2. To develop proficiency in using specific mental computation strategies.
