Proper management of asset/liability risk is facilitated through board approved policy, which sets limits on asset and liability mix, as well as the level of interest rate risk and foreign currency risk to which the credit union is willing to expose itself.

www.dico.com

Asset and liability management is the practice of managing financial risks that arise due to mismatches between the assets and liabilities as part of an investment strategy in financial accounting. ALM sits between risk management and strategic planning. It is focused on a long-term perspective rather than mitigating immediate risks and is a process of maximising assets to meet complex liabilities that may increase profitability. ALM includes the allocation and management of assets, equity, inte
