Unix System Programming Using C++ by Terrence Chan

sprintf is a C function, it cannot use a C++ string object as it's output, even in C++. C++ strings cast to const char *, not char *, and that's an important distinction -- it's const because you're not supposed to write to it. There's no way to overload accesses to a pointer -- if you do, it's no longer a pointer -- so it'll never know to allocate memory to hold what you're writing to it.
